

Energy Focus Inc. becomes official GSA Schedule contractor of energy efficient lighting products for Federal stimulus package projects

SOLON, Ohio, February 16, 2009-- Energy Focus, Inc. (Nasdaq: EFOI), a global leader in energy-efficient lighting technologies, announced today that it has been recognized as an official GSA Schedule contractor [GS-07F-0047V] to the US Government. Under the GSA Schedules Program, GSA establishes long-term government wide contracts with commercial firms to provide access products and services that can be ordered directly from GSA Schedule contractors or through the GSA *Advantage!*® online shopping and ordering system.

“Becoming a recognized GSA Schedule contractor will expedite the procurement of Energy Focus’ energy efficient and green products that support projects to be implemented under the \$787 billion Federal Stimulus package recently passed by the US House of Representatives and Senate. When signed into law by President Obama, the US Government’s policy to upgrade public buildings to become more energy efficient and green will play a significant role in our nation’s economic recovery, protecting our environment and revitalizing our communities.” said Joe Kaveski, CEO of Energy Focus Inc.

For example, the General Services Administrations just announced a \$7 billion backlog of maintenance and repair projects for existing buildings. “Projects that can show significant energy savings and provide the highest return on investment stand the best chance of being implemented. Energy Focus’ LED based lighting solutions offer those advantages, are prequalified, and can now be procured quickly and easily by public agencies.” said Julia Dolsen, Marketing Manager For Energy Focus, Inc.

About Energy Focus, Inc

Energy Focus, Inc. is the leading supplier of energy solutions and the world’s only supplier of EFO®, a lighting technology that is more efficient than conventional electric lamps. Energy Focus has a long standing relationship with the US Government. EFOI’s Energy Star partnership and numerous Research and Development projects for the DOE and DARPA include creating energy efficient LED lighting systems for the US Navy fleet and the next generation Very High Efficiency Solar Cell. Energy Focus products are designed, manufactured and marketed for the commercial lighting and swimming pool markets. Energy Focus solutions provides energy savings, aesthetic, safety and maintenance cost benefits over conventional lighting. Customers include supermarket chains, retail stores, museums, theme parks and casinos, hotels, swimming pool builders and many others. Company headquarters are located at 32000 Aurora Rd., Solon, OH 44139. The company has additional offices in Pleasanton, CA, United Kingdom and Germany.
